Standard Operating Procedure (SOP)
Clinical Trial Management System (CTMS)

1. Purpose

This SOP defines the standard process for using the Enterprise Clinical Trial Management System (CTMS) to manage clinical trials, ensuring regulatory compliance, data integrity, and operational efficiency.

2. Scope

Applies to Sponsors, CROs, Clinical Research Associates (CRAs), Investigators, Site Coordinators, Project Managers, Finance Teams, and Data Managers.

3. Roles and Responsibilities

Sponsor: Approve protocols, budgets, milestones.
Project Manager: Oversee trial execution.
CRA: Perform monitoring visits, SDV, CAPA follow-up.
Site Coordinator: Maintain patient/site records.
Finance: Manage budgets, invoices, and payments.

4. Procedure

Create the trial, configure protocol and sites, activate sites, recruit and enroll participants, conduct monitoring visits, record findings, manage CAPA, process payments, and close out the study while maintaining audit trails.

5. Required Documentation

Protocol, Investigator Brochure, Informed Consent Form, Monitoring Plan, Monitoring Reports, CAPA Records, Site Initiation/Close-out Reports, Budget Documents, Contracts.

6. Compliance

Follow ICH-GCP E6(R3), applicable FDA and EMA regulations, local ethics committee requirements, and organizational SOPs.

7. Data Security

Use role-based access control, protect PHI/PII, maintain audit logs, encrypt data in transit and at rest, and perform regular backups.

8. Quality Assurance

Conduct periodic audits, verify SDV completion, review protocol deviations, and monitor KPIs.

9. Change History

All SOP updates must be reviewed, approved, version-controlled, and communicated to stakeholders.
